

Boost Performance with Connected Track & Trace Systems by Atos Syntel

The number of connected devices has already exceeded the number of human beings on the planet. Research predicts that by the year 2020, there will be 30 billion connected devices in the world. The information generated by these devices needs to be analyzed and acted upon in real-time to enable businesses to reap the benefits of the Internet of Things (IoT) revolution. Atos Syntel's **Track and Trace** solutions help retailers and logistics providers achieve optimum operational efficiency by taking a preventive, rather than a reactive approach.

Overview

Store, warehouse, and yard operations can be drastically improved by IoT-based Track & Trace intelligence, as well as a predictive approach that can help retailers and logistics providers improve overall system uptime. Atos Syntel's Track & Trace solutions help logistics and retail enterprises get ahead by digitally tracking and pro-actively maintaining their assets, preventing faults incidences. We also offer innovative point solutions for specific business cases, such as consignment tracking and cold chain monitoring.

Why Track & Trace?

- Proven, flexible **Connect One IoT platform** that supports custom solutions to meet your business needs
- Ready-made solutions for asset tracking & maintenance, cold chain monitoring, and critical shipment tracking
- Built in analytical engine with visualization layer to enable insights and generate business recommendations
- Enhanced automation and control of your business, by connecting equipment and making it smarter

Atos Syntel's intelligent Track & Trace solutions represent a huge opportunity to improve the quality, safety and productivity of your operations, as well as across the entire retail, supply chain and logistics value chain.
