

Atos Syntel's Regulatory Reporting Solution for Financial Companies

Good data management and robust reporting systems and controls help financial organizations achieve a better view of their company. Incomplete and inaccurate data combined with a lack of integrated reporting meant that risk was not being effectively managed and transparently reported. The challenge for financial services firms is to find a way to handle reporting effectively, as per compliance, and efficiently at an acceptable cost.

The challenges they face are:

- Strengthening risk governance and infrastructure
- Building a robust and flexible enterprise data warehouse
- Improving stress scenario capabilities
- Advance reporting system covering multiple risk regulatory reporting

Solution

Atos Syntel has developed an all round solution to cater to all the reporting needs of financial companies and help them overcome the challenges they face in their daily operations. Our offering helps them with:

- **Integrated Data Management:** Regulatory reporting is core to data management. Through our Integrated Data Management framework, we assist them to standardize, refine, and aggregate data across all client systems for efficient reporting.
- **Metadata Management:** Provides a view into the flow of data, the ability to perform impact analysis, a common business vocabulary, and accountability for its terms and definitions, and finally an audit trail for compliance.
- **Flexible Reporting powered by Axiom:** Atos Syntel has an alliance with AxiomSL, a leading regulatory reporting firm, to provide a reporting platform for flexible and seamless preparation of regulatory reports using existing client database.
- **Integrated Case Management:** Atos Syntel's case management solution, powered by Pega, helps streamline, standardize, and automate exceptions and investigations globally.
