

## Transportation Management Goes Digital with Atos Syntel's TMS – A Mission Critical Application

Logistics and transportation companies constantly strive to achieve higher productivity and provide faster delivery and better customer service at lower cost. With tight margins and fierce competition across the industry, the key challenge is to achieve these goals with the resources available — leading many enterprises to turn to Transportation Management System (TMS) software.

The global TMS market is expected to grow to \$1.7 billion by 2018, with a recent survey of Logistics Management readers showing that 39% of shippers planned to either purchase or upgrade their TMS during the coming year — a clear signal that TMS is becoming an important part of their overall supply chain management strategy.

TMS has the potential to improve visibility, productivity and profitability across the enterprise, deliver flexible and effective routing and load tendering, optimize transportation costs, ensure on-time delivery performance and improve regulatory compliance.

However, to implement or upgrade a TMS, it is important to work with an experienced technology partner to ensure that critical business operations continue undisturbed during the process.

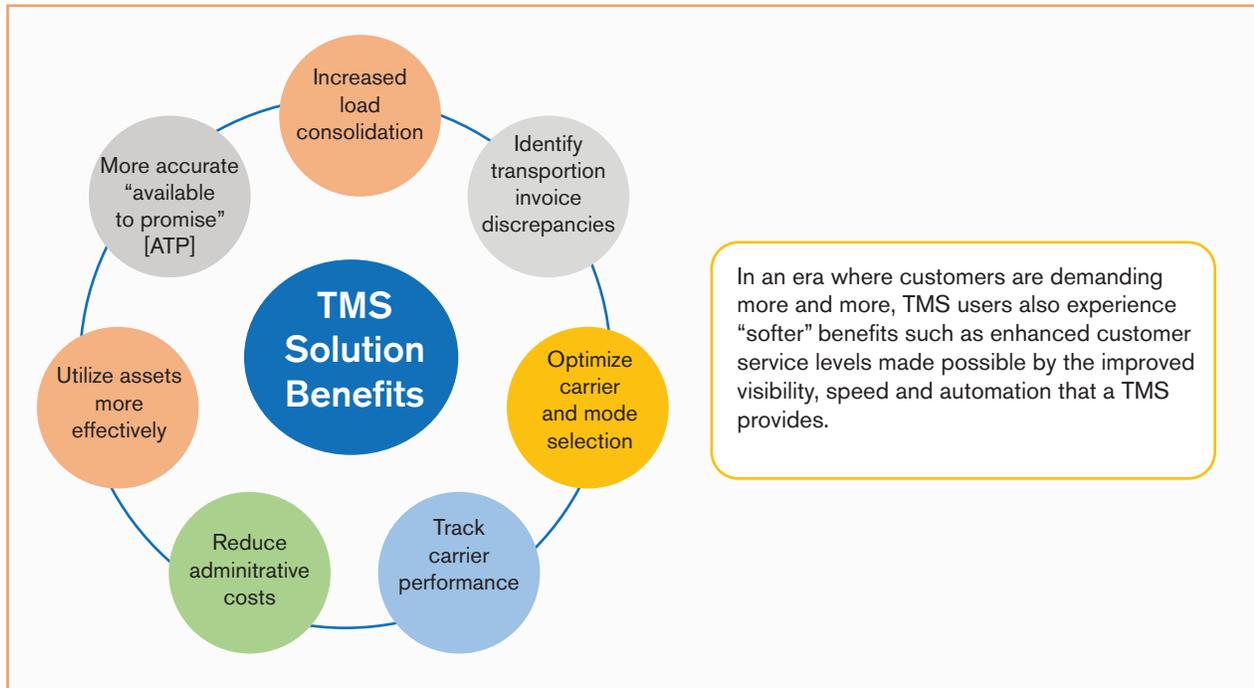

### Atos Syntel's Solution

Atos Syntel offers best-of-breed TMS solutions to support analytics and your profitability, efficiency and customer satisfaction. Atos Syntel's TMS solution encompasses:

- **Digitization:** Digitally transforms the system with improved reporting and predictive analytics capabilities.
- **System Integration:** Integrates disparate systems to maximize automation and efficiency.
- **Legacy Modernization:** MIII (Manage-Migrate-Modernize) is Atos Syntel's self-funding modernization framework, which delivers interconnected services, methodologies, tools and metrics to migrate and modernize along with managed ADM services.
- **Automation:** Atos Syntel streamlines business processes across geographies by automating existing processes and workflows with our proprietary SyntBots® automation platform. SyntBots is a next-generation holistic automation platform that automates your IT Ops, product engineering and business processes across the enterprise.
- **COTS Solution:** Atos Syntel has partnered with Kewill, a leading supply chain product vendor, to support our customers' supply chain execution needs. Kewill offers the comprehensive MOVE® supply chain platform to address customer needs like **transportation management, customs management, global visibility and collaboration.** This enterprise class multi carrier transportation management system supports complex, high-volume shipping from multiple locations as well as international and domestic shipping.

## Business Benefits

- Demonstrated on-time delivery performance up to 99%
- Improved visibility of shipment, carrier optimization and mode selection
- 23% reduction in freight cost through tracking carrier performance, mileage calculator and carrier efficiency analysis
- 95% faster shipments by due to increased load consolidation for LTL shipments and logistics management
- 2-5% reduction in freight bill due to simplified transportation accounting, helping identify inaccurate charges, invoice discrepancies and duplicate payments
- Implementation of freight accounting in TMS ensures safe electronic document storage and retrieval

## About Us

Atos Syntel is a leading global provider of integrated information technology and knowledge process services. Atos Syntel helps global enterprises evolve the core by leveraging automation, scaled agile and cloud platforms to build efficient application development and management, testing and infrastructure solutions. Our digital services enable companies to engage customers, discover new insights through analytics, and create a more connected enterprise through the internet of things. Our "Customer for Life" philosophy builds collaborative partnerships and creates long-term client value by investing in IP, solutions and industry-focused delivery teams with deep domain knowledge.
