Achieve Improved Business Performance with Atos Syntel's SharePoint Services

Collaboration and enterprise social networking play a pivotal role in achieving the business productivity and performance required in the Digital Age. Most organizations deploy multiple platforms and services to achieve these goals, which leads to high maintenance costs and security risks associated with the integration of new platforms with existing IT infrastructure.

To make the most out of your technology investments, it is important to consolidate your collaboration platforms to a unified, centralized platform, thus improving accountability and visibility across the enterprise. Atos Syntel offers a risk-free and cost-effective migration solution that simplifies and consolidates disparate content management systems to SharePoint.

Solution

Our customizable SharePoint migration solution, TransPoint®, offers a comprehensive migration solution for modernizing legacy content management systems to SharePoint, offering limitless capabilities for digital enablement. The TransPoint suite includes:
