

Reengineered Applications and Real-time Dashboards with Atos Syntel's One-Stop Auto Finance Solution

As auto financial institutions seek to extend their geographical spread, they are faced with the difficulty of handling multiple dealers across locations, and the laws and regulations governing each location.

In a bid to increase operational efficiency, they are investing in emerging technology, but this *improved* IT landscape comes with a few challenges:

- A complex IT infrastructure
- Higher cost of ownership
- Unrealized tangible ROI from technology investments

Auto financial institutions are unable to dedicate time and resources to resolve these challenges.

In this scenario, it is crucial to choose a skilled and capable technology partner who can focus on your business and technical needs.

KEY FEATURES OF THE SOLUTION

- **Business Process Management (BPM)** methodology, to streamline processes
- **Enterprise Architecture Interface (EAI)**, to enhance geo-specific processes and portals
- **Business Intelligence (BI) analytics**, to align data warehouses and simplify data
- **Multi channel integration of services** through contact centers, online banking portals and mobile technology
- Atos Syntel's dedicated **BI Analytics Center of Excellence (CoE)** for database migration and enhancement

Solution – the Auto Finance Comprehensive Solution

Auto finance providers offer a range of services, from credit applications to payments and fund transfer, and these processes are currently supported by Human Resources, Financial Reporting and Accounting. Atos Syntel is an established leader in IT solutions and services and can help you align these processes with your business objective of scalability and cost management.
