
Unleash enterprise potential with Atos|Syntel's MIII solution

The rapid evolution of disruptive technologies and the entrance of new digital players is forcing traditional businesses to adapt and transform. However, many enterprises find it difficult to overcome the challenges of mainframe systems and their high upkeep and maintenance costs.

Trusted partner for your Digital Journey

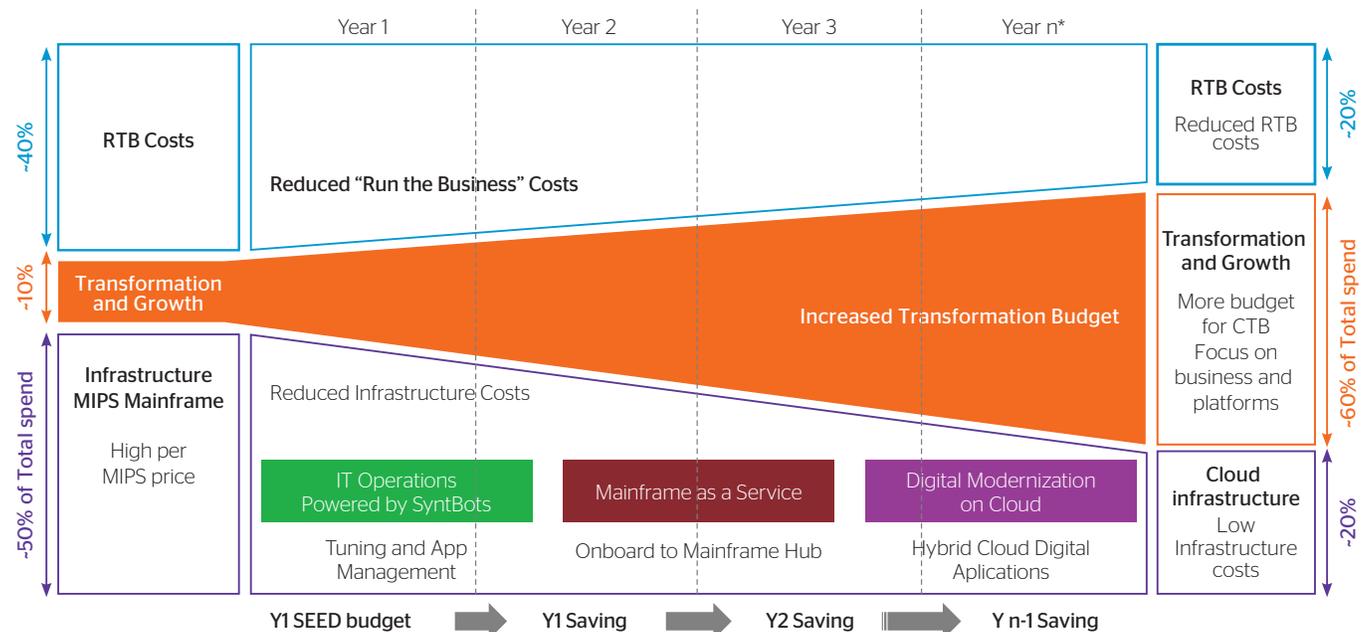

Atos | Syntel

Today's global enterprises must meet the expectations of their digital native customers, while simultaneously modernizing their core IT systems to meet the demands of the Digital Age.

Our solution

AtosSyntel's MIII (Manage Migrate Modernize) solution enables enterprises to realize the true potential of mainframe platforms by bringing efficiencies to their IT operations. Whether you are committed to staying on mainframe or ready to "pull the plug," we offer options that reduce risk, improve efficiency, and enable you to modernize the enterprise at a pace that is right for you.

As illustrated below, MIII delivers year-over-year savings on your "run-the-business" costs, which can be reinvested to fund digital transformation initiatives.

* Number of Years required to achieve self funded modernization depends upon size and complexity of application portfolio

* Number of Years required to achieve self funded modernization depends upon size and complexity of application portfolio

MIII employs three primary levers to achieve a sustainable self-funding modernization program for your enterprise. They are:

Manage

Streamline your IT operations with intelligent automation and proactive maintenance powered by the SyntBots automation platform. The goal is to achieve "always on" infrastructure and lower maintenance costs. Typical results include:

- 20-30% reduction in application management costs
- 30% of incidents are eliminated
- 60% automation for LO/L1 support
- 35% savings on SME efforts

Migrate

For companies committed to mainframes, our Mainframe as a Service (MaaS) migrates your infrastructure to Atos Mainframe Hub to achieve elastic data center operations, tactical workload reduction, mainframe DevOps, performance optimization and cost savings based on economies of scale. The results include:

- 15-20% up-front platform cost savings
- 130,000+ installed MIPS on mainframe hub
- Access to 2,000+ mainframe experts
- Industry-leading security and compliance

Modernize

Incrementally modernize mainframe applications to a cloud-native, microservices based architecture in order to achieve truly digital operations that will become the backbone for your transformation and growth initiatives.

- Risk-free modernization
- Automation levels as high as 70%
- 100,000+ legacy instances moved to cloud or retired
- 2X faster modernization

Our solution enablers

- Atos **global mainframe hubs** for added scalability without capital investment
- **SyntBots automation platform**, to automate IT and business process operations
- **Liber software suite**, for replatforming legacy applications to open standards
- **Exit Legacy** modernization accelerator platform
- **TransPoint** automated migration tool
- **Cloud studio** for accelerated transformation to cloud
- **Atom** digital app development toolkit

Atos|Syntel in action

Enabled a leading distribution company to migrate from dedicated mainframe to Atos Mainframe Hub – **reducing annual TCO by \$2.5 million**, which was used to fund other **digital transformation initiatives**.

Reduced mainframe costs by 10% year-over-year and **eliminated complexity** for a large financial services company, by delivering application support and maintenance, rationalization, transformation and performance management.

Helped a leading credit card company migrate card acquisition from **mainframe** to a **cloud-native microservices** architecture, resulting in **nearly-instant card processing** and faster time to market.

Reduced maintenance costs by 50% and **improved customer experience** for a Fortune 100 home improvement retailer, through modernization, integration, mobile selling solutions, cloud enablement and digital supply chain management.

Digitized policies and implemented electronic policy delivery for a large insurer, creating **\$15 million in new business** and **higher customer satisfaction**.

About Atos|Syntel

Atos|Syntel is a leading provider of integrated digital and knowledge process services and a member of the Atos Group, a global leader in digital transformation with 110,000 employees in 73 countries and annual revenue of €12 billion. We help enterprises accelerate their digital journeys, increase agility and business performance, evolve to “Digital native” standards, and deliver scale and flexibility for the Digital Age.

Atos|Syntel unites Atos's scale and world-class technology capabilities with Syntel's industry focus, global delivery model, and services powered by intelligent automation.
