

## Helping a Client Meet 21CFR11 Regulations and Guidelines

### BUSINESS GOALS

The client is a global medical device, pharmaceutical and biotech company. They were facing increased litigation due to regulatory submissions that did not adhere with FDA 21CFR11 regulations and guidelines. They clearly needed help ensuring that their applications were compliant in GxP regulated areas, so they turned to Atos Syntel based on our life sciences expertise as well as our robust, risk-based computer system validation (CSV) methodology.

### BUSINESS BENEFITS

Solution was mapped to 100% of user requirements

Eliminated the need to print, sign, scan and re-import forms for key submissions

Enabled the rapid approval of final documents, and improved cross-functional document approval

Resulting validation was compliant to FDA 21 CFR Part 11 requirements

### CHALLENGES

- Stringent regulatory timelines
- Corrective & preventive actions (CAPA) were risky and time sensitive, because of the mission-critical systems involved
- Lack of documentation on tools, licenses, and system manuals
- Gaps and inconsistencies in document management conventions
- Lack of standardized (CSV) documentation development methodology
- Differing validation strategies for different GAMP categories

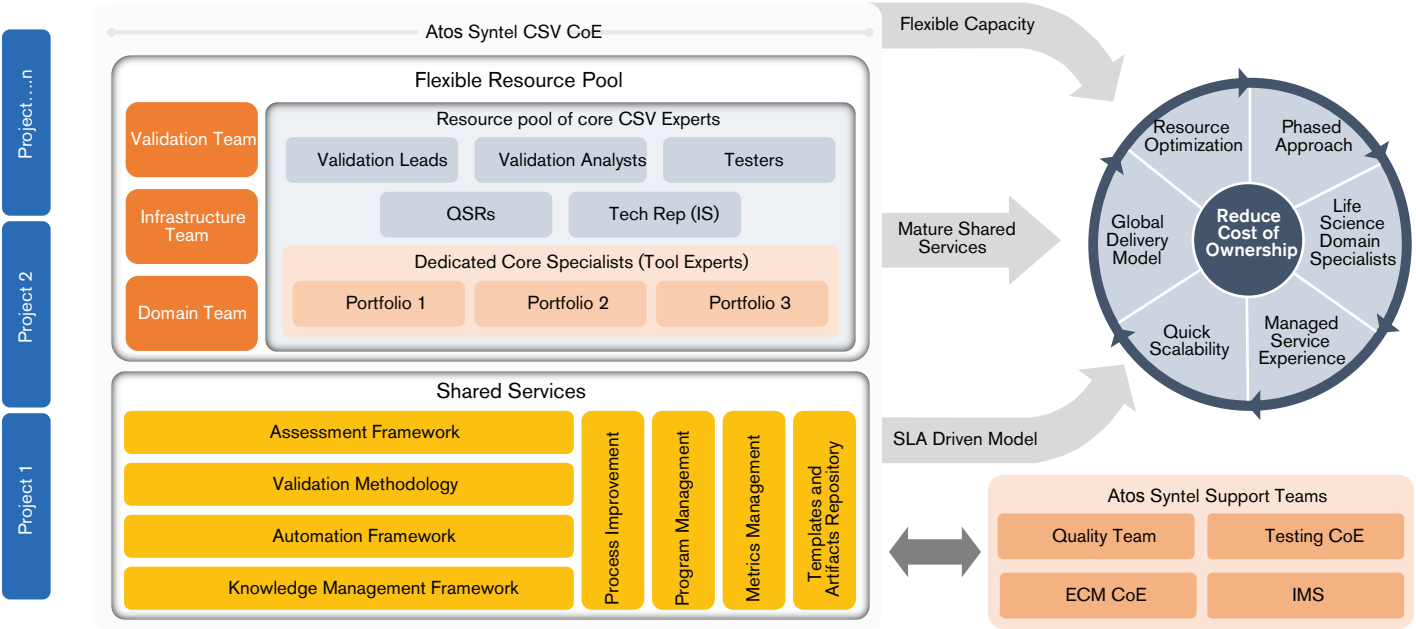

categories

- Building protocols for qualifying the system to IQ/OQ/PQ
- Performing quality and regulatory assessment and 21 CFR Part 11 coverage assessment
- Creating a validation plan, user requirement and functional specifications, risk assessment, qualification protocol and qualification test cases
- Working with the client's corporate quality group to develop and implement standard operating procedures (SOP) and update policies, procedures and SOP templates
- Identifying, analyzing and tracking project risks to make test execution more effective
- Ensuring all test cases were accurate and correct, capturing evidence on test case execution
- Implementing virtual machines, making it easier to access and work on the tools remotely
- Documenting the test results concurrently with qualification test execution
- Creating dashboards for senior management

### SOLUTION

As part of this validation project, Atos Syntel provided a comprehensive, fully-documented computer system validation that is auditable for all internal and 21 CFR Part 11 requirements. Our solution helped the client expedite the validation of business critical applications and ensure adherence to FDA regulations. Our role in executing the project was as follows:

- Developing a project strategy using a risk-based approach
- Performing high-level and detailed risk assessments and assigning applications to high, medium, and low risk

## About Us

Atos Syntel is a leading global provider of integrated information technology and knowledge process services. Atos Syntel helps global enterprises evolve the core by leveraging automation, scaled agile and cloud platforms to build efficient application development and management, testing and infrastructure solutions. Our digital services enable companies to engage customers, discover new insights through analytics, and create a more connected enterprise through the internet of things. Our "Customer for Life" philosophy builds collaborative partnerships and creates long-term client value by investing in IP, solutions and industry-focused delivery teams with deep domain knowledge.
