
Implementing an ERP overhaul for optimized business operations

Business goal

Our client is a US-based leading manufacturer of application-specific fluid power and power transmission solutions. Their products, services, and solutions touch clients across 100 locations in 30 countries. The company deals with highly customized processes across finance, manufacturing, supply chain management, and trade management functions. The company wanted to increase business efficiency while cutting costs.

Technical challenges

The company was operating on legacy systems which needed an overhaul across functions. Achieving this in a multi-country, multi-currency and multi-language scenario posed a major challenge, especially while taking scalability into account. The company had a legacy WMS system.

Atos Syntel solution

Atos Syntel suggested and implemented Oracle R12 ERP using maximum out-of-the-box functionalities. Atos Syntel also re-engineered the company's processes and enabled automated end-to-end testing. We also resolved OAF related issues. The SYNDMT Atos Syntel data migration tool was used, providing seamless data migration.

Business results

Atos Syntel's solution helped reduce time and resources required for implementation while providing our client with configured business processes to improve overall effectiveness. This, in turn, led to a **70% reduction in cutover time and 25% cost savings due to offshore development and testing**. The addition of Voice Picking helped **improve warehouse efficiency by 43%**. Efficient deployment of automation increased productivity by 30% in just a month.

Atos Syntel is a leading provider of integrated IT and knowledge process services and a member of the Atos Group, a global leader in digital transformation with 110,000 employees in 73 countries and annual revenue of over €11 billion. We help enterprises accelerate their digital journeys, increase agility and business performance, evolve to "Digital native" standards, and deliver scale and flexibility for the Digital Age.

Atos Syntel unites Atos's scale and world-class technology capabilities with Syntel's industry focus, global delivery model, and services powered by intelligent automation.
